

Astroscale is the first private company with a vision to secure the safe and sustainable development of space for the benefit of future generations, and the only company solely dedicated to on-orbit servicing across all orbits.

Founded in 2013, Astroscale is developing innovative and scalable solutions across the spectrum of on-orbit servicing missions, including life extension, in-situ space situational awareness, end-of-life services, and active debris removal, to create sustainable space systems and mitigate the growing and hazardous buildup of debris in space. Astroscale is defining business cases and working with government and commercial stakeholders to develop norms, regulations, and incentives for the responsible use of space.

Headquartered in Japan, Astroscale has an international presence with subsidiaries in the United Kingdom, the United States, Israel, and Singapore. Astroscale is a rapidly expanding venture company, working to advance safe and stable growth in space and solve a growing environmental concern. End of Life Services by Astroscale-demonstration (ELSA-d), the company's first on-orbit demonstration of debris capture and removal, launched in March 2021.

Astroscale U.S. Inc. is currently seeking a **Graduate Regulatory Intern** to join our team in our Washington, DC, location, with the possibility of remote work. In this role you will support the Regulatory Counsel in tracking, organizing, and writing responses to regulatory matters of importance to Astroscale U.S.

The length of the internship will be from September 2022 to April 2023, approximately 20 hours per week and pays \$25/hour.

To apply: Email careers@astroscale-us.com with **Graduate Regulatory Intern** in the subject line.

A complete application packet includes:

- A resume
- A writing sample (3-5 pages) of own work
- List of course work taken or in progress

The application deadline is Friday, August 19th, 2021.

Scope of Work

- Support research in preparing draft responses, and draft responses, to various government RFIs.
- Work closely with engineering staff to translate information into narrative forms
- Support policy work, including: attending events, taking notes, and managing outreach for ongoing projects.
- May include work to analyze export scenarios for space-related commodities

Astroscale U.S. Inc.
2201 S Delaware St
Denver, CO 80223
